Ingredients per Capsule (Daily Dose):

Apple cider vinegar extract at a dosage of 100 mg is commonly linked to supporting digestion and controlling appetite. It can help maintain healthy internal pH levels and decrease the desire for sugary foods. Its use often aims to induce a feeling of fullness and improve the digestive process.

The guarana extract, derived from the *Paullinia cupana* plant and containing 100 mg of caffeine, is a plant native to the Amazon that aids in maintaining energy levels and mental acuity. Its contribution to thermogenesis is well-known, which could help in supporting fat metabolism.

Inulin powder from Jerusalem artichoke – 100 mg: A prebiotic fiber that helps nurture healthy gut flora, inulin plays a significant role in supporting gastrointestinal wellness and enhancing the body's ability to absorb key nutrients from food.

With a content of 50mg, L-Glutamine is a necessary amino acid for supporting the preservation of the intestinal lining. It helps in cellular repair and energy creation, and it could also play a role in managing cravings and aiding in recovery post-exercise.

In a dose of 50 mg, L-Leucine is crucial for protecting muscle mass when reducing calories and improving body composition, especially with an active lifestyle.

Zinc (citrate) – 14 mg (140% NRV): Zinc contributes to a variety of metabolic processes, including carbohydrate and fat metabolism, while supporting immune health. It may play a role in regulating leptin and ghrelin—hormones associated with hunger and satiety.

Chromium picolinate, providing 40 µg (100% NRV), assists in maintaining healthy blood sugar levels and insulin performance. It is a popular ingredient in products promoting weight control by promoting energy stability and decreasing the desire for sugary foods.

The casing of the capsule is manufactured from hydroxypropylmethylcellulose (HPMC), which is a plant-based material that is vegan-friendly. To maintain the capsule's shape and stability, an anti-caking agent (E470b) is integrated.

These synergistic ingredients are combined to promote metabolic efficiency, digestive comfort, and energy balance as part of a clean, once-daily approach to weight maintenance.

Launch Overview: Nixol Now Shipping in the United Kingdom and Ireland

Nixol, a plant-derived dietary supplement promoting weight balance, is now accessible to customers in the UK and Ireland. This geographically centered release signifies the start of market penetration for a product created to cater to the requirements of grown-ups in search of systematic metabolic aid using natural, daily supplementation.

Nixol Capsules introduce a vegan-friendly, non-GMO combination of elements directed towards supporting balanced energy levels and weight management objectives without depending on synthetic additives or aggressive stimulants. The launch of the product in these locations highlights the brand's strategic decision to adhere to regulatory guidelines and provide direct customer service and product education.

This strategic entry into the UK and Ireland comes amid rising consumer demand for clean-label wellness products that emphasize safety, transparency, and simplicity. By limiting initial distribution to these markets, Nixol maintains close oversight of product feedback and delivery standards, laying a foundation for future scaling

About Nixol

Nixol is a natural dietary supplement developed to help adults maintain their daily metabolic and nutritional harmony. Crafted based on clean-label principles and manufactured in compliance with GMP safety guidelines, Nixol is free from synthetic stimulants, added sugars, and artificial preservatives.

Each capsule combines plant-based compounds with trace nutrients recognized for their role in supporting normal metabolism, digestion, and energy levels. As a once-daily product, Nixol is positioned to complement a healthy lifestyle without introducing complexity or chemical burden.

The initial market rollout is intentionally confined to the UK and Ireland, with future enlargement contingent upon performance measurements and regulatory assessment. There are presently no promotional deals, packages, or incentives being presented.

The Food and Drug Administration has not reviewed any of the statements mentioned. This product is not intended for diagnosing, treating, curing, or preventing any diseases.

Intended Use and Audience

Nixol is a dietary aid targeting healthy adults who are 18 years old and older.

Looking for a natural approach to support weight regulation

Fascinated by plant-derived, simple ingredient supplements

On the lookout for easy, once-a-day nutritional fixes.

Not currently pregnant, breastfeeding, or managing acute medical conditions

Always consult a healthcare professional before using any supplement, especially if you are taking medications or dealing with preexisting conditions. Nixol should not be given to children, and it is not a suitable replacement for a diverse and balanced diet.

Safety and Usage Information

Nixol is designed for daily oral use. The recommended intake is one capsule per day, taken with a large glass of water, ideally 15–30 minutes before or during a main meal. Capsules should not be chewed. If swallowing is difficult, the capsule can be opened and its contents mixed with water.

Ensure you do not surpass the prescribed daily dosage. In the event of a missed dose, refrain from doubling up the next day. Although infrequent, potential side effects could be dry mouth in certain situations. Nixol does not hinder driving aptitude or the efficacy of oral contraceptives.

Manufactured in compliance with relevant food safety and hygiene regulations, the product incorporates non-GMO and additive-free ingredients whenever feasible. Nixol's company stresses transparency in production and clear labeling for consumer assurance.
