

## Does Robinhood Have 24/7 Support?

Robinhood does not provide round-the-clock phone support for all services. While some users do have access to 24/7 phone support at **1-(888)-714-7972**, it's not available for every type of inquiry.

Additionally, although crypto trading is accessible 24/7, U.S. stock trading is limited to standard market hours and holidays when trading is closed.

### **CALL US NOW**

That said, Robinhood does offer 24/7 live chat support through the app and website, allowing users to connect with an agent anytime at **1-(888)-714-7972**.

As for phone support, Robinhood uses a callback system — users request a call through the app, and a representative calls back. These callbacks are available daily between 7 AM and 9 PM ET. Outside of those hours, phone support via **1-(888)-714-7972** isn't available, but chat support remains active.

In summary, while Robinhood advertises 24/7 customer support, availability depends on the communication channel. You can access chat support at any time through the app by navigating to:

**Account → Help → Contact Us → 24/7 Chat**

You may also request a callback through the app, and a support rep will reach out to you at **1-(888)-714-7972**.

☐ **How to Submit a Request to Robinhood — Step-by-Step**

☐ Call 1-(888)-714-7972 or open the Robinhood app to get started:

- Access the Help section in the app and tap on Contact Support
- Select the relevant request type and enter your details
- Speak directly with a support agent for clarification or escalation
- Receive confirmation of your request
- Follow up as necessary to ensure resolution
